PROFESSIONAL SUMMARY

I am P. Harshavardana Reddy, a sophomore at **KL University**, holding global certifications such as **AWS Certified Cloud Practitioner (CLF-C02)**, **Oracle Certified Professional Java SE 11 Developer (1Z0-819)**, **RedHat Certified Application Developer (EX183)**, and **AWS Certified Developer – Associate (DVA-C02)**.

Skilled in **Java Full Stack Development with Spring Boot and Microservices**, **Python Full Stack Development**, and **MERN Stack Web Development**, I am currently mentoring students as a Peer Mentor for **Continuous Delivery and DevOps**. I am actively seeking internship opportunities to further enhance my technical expertise and contribute meaningfully to innovative projects in software development and cloud computing.

EDUCATION

BACHELOR OF TECHNOLOGY, COMPUTER SCIENCE AND ENGINEERING(HONORS)

Expected in 07/2026

K L Deemed To Be University, Vaddeswaram

GPA: 9.4

INTERMEDIATE

03/2022

BIIT Junior College, Guntur

GPA: 8.3

SSC

03/2020

BHASYAM E.M, HS, Vijayawada

GPA: 10.0

EXPERIENCE

KL UNIVERSITY

Vaddeswaram, India

Student and Subject Peer Mentor

08/2023 to Current

- I am currently working as a student and subject peer-mentor at K L University.

CERTIFICATIONS

- [AWS Certified Developer – Associate \(DVA-C02\), Amazon Web Services, January 2025.](#)
- [RedHat Certified Application Developer \(EX183\), RedHat, September 2024.](#)
- [Certified Oracle Professional Java SE11 Developer \(1Z0-819\), Oracle, August 2024.](#)
- [AWS Certified Cloud Practitioner \(CLF-C02\), Amazon Web Services, April 2024.](#)
- [Software Engineer \(SWE\) Intern, HackerRank, June 2024.](#)
- [Postman API Fundamentals Student Expert, Postman, February 2024.](#)
- [B1 level in Cambridge University Lingua Skills Exam, Cambridge English, August 2023.](#)

SKILLS

- Programming Languages:** Proficient in C, C++, Java (Certified Professional from Oracle), Python, and JavaScript.
- Database Management:** Skilled in SQL and MongoDB.
- Frameworks:** Extensive experience with Spring, Spring Boot, and Hibernate.
- Version Control & Containerization:** Proficient in Git and Docker.
- Strong Communication Skills.**
- Expertise in Object-Oriented Programming (OOP) and Data Structures and Algorithms (DSA).**
- Full-Stack Development:** Expertise in Java Full Stack Development (Spring Boot with React.js), MERN Stack (MongoDB, Express.js, React.js, Node.js), and Django.
- Backend Development:** Proficient in Node.js, Express.js, Django, and Spring Boot Microservices.
- Frontend Development:** Proficient in HTML, CSS, React.js, and Next.js.
- Cloud Computing:** Skilled in AWS Cloud Services and Deployment.
- Web Services:** In-depth knowledge of SOAP and RESTful APIs.

PROJECTS

- **Online Assignment and Grading System (Spring-Boot with React.js):** Full-Stack application developed using **Spring Boot** for the backend and **React.js** for the frontend. Supports complete **CRUD operations** for assignments, submissions, and grading. Handles **PDF uploads and processing** for assignment submissions and feedback. Implements **JWT Authentication** and **Role-Based Access Control (RBAC)** for secure user management. Integrated an **email notification system** to notify users of activities like submissions, grading updates, and deadlines.

Project GitHub Link: [GitHub-Link](#)

- **University Event Management:** The University Event Management System is a comprehensive application developed using **Java EE** with **JPA (Java Persistence API)**, **JSF (Java Server Faces)**, and **JSP (Java Server Pages)**. The system is designed to facilitate the registration and management of various events organized by university departments. It allows students to register for events, administrators to manage events, and generate final winners. Additionally, the system provides functionalities for downloading certificates and generating client profiles. Additionally, I have introduced email notifications where the students and faculty receive emails based on their activities.

Project GitHub Link: [GitHub-Link](#)

- **Employee Leave Management System (MERN):** The Employee Leave Management System is an **MERN (MongoDB, Express.js, React.js, Node.js)** based Full-Stack application with real-time Email Authentication and real-time email notifications and CRUD Operations and Secured with JWT Authentication and Role-Based-Access-Control.

Project GitHub Link: [GitHub-Link](#)

- **Music Streaming Services (Python-Django):** The Music Streaming Services is an Full-Stack application developed using **Python-Django** implementing full **CRUD operations**. Enabled role-based functionality with **Role-Based Access Control (RBAC)** for secure and efficient user management. Admin functionality includes adding, updating, and managing songs. Customers can log in to explore and listen to their favorite songs. Ensured seamless user experience with secure authentication and intuitive design.
